

5 important JavaScript data questions

Q-1: Count Frequency of Each Element

Q-2: Find Second Largest Element

Q-3: Check if Array is Sorted (Ascending)

Q-4: Move All Zeros to End

Q-5: Find Missing Number (1 to N)

Q-1: Count Frequency of Each Element

```
const arr = [1, 2, 2, 3, 3, 3];  
const freq = {};  
  
for (let num of arr) {  
  freq[num] = (freq[num] || 0) + 1;  
}  
  
console.log(freq);
```

Output - > { 1: 1, 2: 2, 3: 3 }

Q-2: Find Second Largest Element

```
const arr = [10, 5, 20, 8];  
let largest = -Infinity;  
let secondLargest = -Infinity;  
  
for (let num of arr) {  
  if (num > largest) {  
    secondLargest = largest;  
    largest = num;  
  } else if (num > secondLargest &&  
num !== largest) {  
    secondLargest = num;  
  }  
}  
console.log(secondLargest);
```

Output:- 10

Q-3: Check if Array is Sorted (Ascending)

? Problem

```
const arr = [2, 5, 8, 12];  
let isSorted = true;
```

```
for (let i = 1; i < arr.length; i++) {  
  if (arr[i] < arr[i - 1]) {  
    isSorted = false;  
    break;  
  }  
}
```

```
console.log(isSorted);
```

Output > true

Q-4: Move All Zeros to End

? Problem

```
const arr = [0, 1, 0, 3, 12];  
let result = [];
```

```
for (let num of arr) {  
  if (num !== 0) {  
    result.push(num);  
  }  
}
```

```
while (result.length < arr.length) {  
  result.push(0);  
}
```

```
console.log(result);
```

Output > [1, 3, 12, 0, 0]

Q-5: Find Missing Number (1 to N)

? Problem

```
const arr = [1, 2, 4, 5];  
const n = arr.length + 1;  
  
const expectedSum = (n * (n + 1)) / 2;  
const actualSum = arr.reduce((sum, num)  
=> sum + num, 0);  
  
console.log(expectedSum - actualSum);
```

Output > 3
